## About this document

- This document provides the latest information about the Hitachi Storage Plug-in for VMware vCenter. It includes information that was not available at the time the technical documentation for this product was published and known problems and solutions.

## Intended audience

- This document is intended for customers and Hitachi Ltd. partners who license and use the Hitachi Storage Plug-in for VMware vCenter.

## Getting help

The Hitachi Data Systems Support Center staff is available 24 hours a day, seven days a week. Provisions for patches and fixes are restricted to normal business hours, 8 a.m. to 5 p.m. PST.

To reach us, please visit the support Web site for current telephone numbers and other contact information: <http://www.hds.com/services/support/>. If you purchased this product from an authorized HDS reseller, contact that reseller for support.

Before calling the Hitachi Data Systems Support Center, please provide as much information about the problem as possible, including:

- The circumstances surrounding the error or failure.
- The exact content of any error message(s) displayed on the host system(s).

## Software and Hardware Support

The software and hardware listed below is supported by this release. Hardware and/or software not listed in the table(s) below is not supported by this release.

## Changes in this Release

### New features and important enhancements

- Not Applicable for this release.

### Known Problems

- By the setting contents of the following items to be set in storage system, Hitachi Storage Plug-in may not work normally. Please refer Chapter 3 of the Hitachi Storage Plug-in for VMware vCenter User's Guide about the problematic setting contents.
  - Resource group name
  - Host group name
  - DP pool name
  - A user name to use when registering storage system with HDvM

### Fixed Problems

- Fixing the defect of the Add Storage function at the time of P.P.[Dynamic Provisioning] locking for the AMS2000 series /HUS100 series.
- Fixing the defect of the Provision Datastore function for RAID Group for the AMS2000 series/HUS100 series.
- Fixing the problem that information of RAID Group cannot be displayed on the Storage Configuration screen of Provision Datastore.

## Restrictions and Considerations

Refer to "3 Restrictions and Considerations" of the Hitachi Storage Plug-in for VMware vCenter User's Guide(MK-92ADPTR047-04).
